# Chemistry = clean

**at top speed**  
You can see it before your very eyes. Accelerator, clutch, go! From 1 to 100 in 5 seconds. Your knee even grazes the tarmac as you ride a sharp corner. Sporty! Or just a leisurely bike ride along a country lane. Perfectly possible too.

**liquid**  
Petrol contains additives to lubricate the motor better and to allow high compression, and therefore greater efficiency. Higher performance with less fuel. Chemistry removes the most noxious substances. The catalytic converter ensures cleaner exhaust fumes. That's also vital.

**Chemistry is discovering**  
In your iPod, your Mars bar, your Nikes. Even in the chemical processes in your body. Chemistry continuously makes discoveries about everything. Don't stand on the sideline. Make it your game.  
This campaign is an initiative undertaken by companies in the chemical sector, schools and universities. Like to know more??
